

**U.S. News and World Report 2012
Undergraduate Rankings
University of Georgia Results**

James M. Byars, M.Ed
Graduate Assistant
Office of Institutional Research
September 2011

In the 2012 *U.S. News and World Report* Undergraduate Rankings, the University of Georgia (UGA) ranked 62nd among national universities and 23rd among public universities. In comparison with last year's rankings, UGA fell six ranks in the national university category and five spots in the public university. In 2011, UGA was tied with the Ohio State University - Columbus, Purdue University - West Lafayette, and the University of Maryland - College Park at 18th in the *Top 30 Public University* rankings. In the 2012 edition, Ohio State and Maryland were ranked higher in both rankings. Also, Texas A&M University, University of Pittsburgh, and University of Connecticut eclipsed UGA in both rankings. Purdue suffered a similar drop in rankings and was tied with UGA at 23rd among public universities.

The Terry College of Business was ranked as the 28th Best Undergraduate Business Program with top 25 rankings for programs in Accounting (17), Insurance (2), Management (22), Management Information Systems (14), and Real Estate (3). Of UGA's Board of Regents Peers, the University of Iowa and Florida are tied with UGA at 28th, Michigan State University was ranked 24th, and Pennsylvania State University and University of Maryland were ranked 20th in undergraduate business programs. The undergraduate engineering program was ranked 144th which was down from 127th the year before. UGA was ranked 80th among national universities by High School Counselor and 18th for the least debt assumed by the class of 2010.

2010	58*	21
2011	56*	18*
2012	62*	23*

* Represents Tie

The following is a summary of significant changes in institutional statistics and rankings from 2011 to 2012:

- The Undergraduate Academic Reputation Index remained constant at 71 although the peer assessment score increased one-tenth of a point and high school counselor score decreased two-tenths. A greater weight was placed on peer assessment score (15.0%) than high school counselor (7.5%) which explains why each score offsets the other. The difference between scores and sub-factor weights is 2:1.
- UGA gained five spots in the Graduation & Retention Ranking, two in Faculty Resources, and seven in the Alumni Giving. These gains were offset the loss of seven spots in the Selectivity and the Financial Resources Rankings.
- There was a ten-point decrease in the 25th percentile score in the SAT scores of incoming freshmen class. This decline is confirmed by the ten point decrease in the SAT quantitative scores in 2010 which was reported in UGA's 2010 Common Data Set.

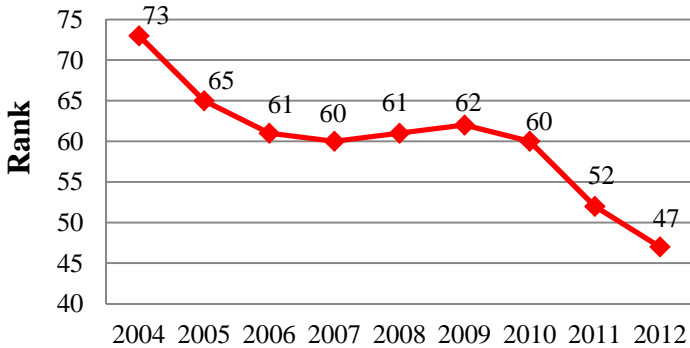

- UGA have less incoming freshmen (-1.0%) enrolled that were ranked in the top ten percent of their high school graduating class.
- UGA's graduation rate performance (i.e. over/under performance) was smaller in 2012 than 2012.

Methodology: U.S. News and World Report Ranking

Category	Category Weight	Sub-factor	Sub-factor Weight
Undergraduate Academic Reputation	22.5%	Peer Assessment Score	15.0%
		High School Counselor Score	7.5%
Student Selectivity	15.0%	Acceptance Rate	1.5%
		Freshmen in Top 10% of Class	6.0%
		SAT/ACT Scores	7.5%
Faculty Resources	20.0%	Faculty Compensation	7.0%
		Percentage Faculty with Top Terminal Degree	3.0%
		Percent Full-Time Faculty	1.0%
		Student/Faculty Ratio	1.0%
		Class Size (1-19 Students)	6.0%
		Class Size (50+ Students)	2.0%
Graduation & Retention Rank	20.0%	Average Graduation Rate	16.0%
		Average Freshmen Retention Rate	4.0%
Financial Resources	10.0%	Average Educational Expenditures Per Student	10.0%
Alumni Giving	5.0%	Average Alumni Giving Rate	5.0%
Graduation Rate Performance	7.5%	Graduation Rate Performance	7.5%

Above are the category and sub-factor weights that were publically announced in both 2011 and 2012 *U.S. News and World Report*. In previous editions, the undergraduate academic reputation was solely expressed by the peer assessment score which weighted at 25.0%. However in recent editions the category is weighted at 22.5% with sub-factors weights for peer assessment score and high counselor score at 15.0% and 7.5% respectively. The graduation rate performance was given a higher weight at 7.5% from 5.0%. The actual methodology calculating rankings and overall scores is a closely guarded secret of the *U.S. News and World Report*. These weightings can provide valuable insight into significant statistical and potential policy changes which may insult in an institution moving up and down the rankings. These weightings will be used in the report to explain the changes in the University of Georgia's position from the 2011 to 2012 editions relevant to similarly rankings institutions.

Clarification Notes

- The Undergraduate Academic Reputation Index allows for top academics (i.e. presidents, provosts, and deans of admissions) to assess the institutional excellence regarding undergraduate education. In 2001, this score introduced an assessment from high school counselors to rate an institution's programs. These scores are collectively a measure of the undergraduate academic quality of an institution.
- The Financial Resource Index measures an institution's average educational expenditures per students in the fiscal years of 2009 and 2010. These expenditures include instruction, research, student services, and other related educational expenditures.
- The Alumni Giving Index measures the average donations of living alumni with bachelor's degree from 2008 – 2009 and 2009 – 2010. The *U.S. News and World Report* consider this measure to be an indirect indicator of student satisfaction with education from the institution.
- The freshmen retention rate is the average proportion of freshmen entering school from fall of 2006 to fall of 2009 who returned the following year. The *U.S. News and World Report* methodology does not factor in the differences from edition to edition.

Selective Peer Comparison**

Executive Summary

All comparative rankings to the Aspirational Peers are out of 13 institutions including UGA.

Institutional Rankings

- UGA has ranked 12th in National and Public University categories among Aspirational Peers from 2008 through 2012. The University of Minnesota - Twin Cities was ranked lower than UGA in both rankings.

Institutional Characteristics

- UGA had the lowest Undergraduate Academic Reputation Index in both 2011 and 2012. UGA's performance in the two sub-factors (Peer Assessment Score and High School Counselor Score) was also at the bottom.

Graduation & Retention Ranking

- UGA was ranked 10th in this category in 2012 and 2011. This is an improvement from 2008 when UGA was ranked 11th.

Faculty Resources Rank

- UGA has constantly remained above the median rank of Aspirational Peers. In 2011 and 2012, UGA was ranked 7th. Six out of 12 aspirational peers declined in rankings 2008 to 2012.

Selectivity Ranking

- UGA has constantly been ranked 11th in this category ahead of the University of Minnesota - Twin Cities and Pennsylvania State University - University Park from 2008 - 2012. Eight aspirations peers lost ranks from year to year. Penn State dropped fourteen spots and University of Texas - Austin did six spots.

Financial Resources Rank

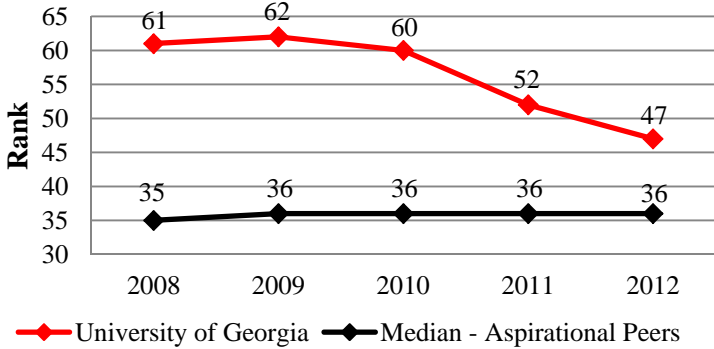

- UGA was ranked the lowest in the Financial Resources Rank from 2008 to 2012. Ten peers increased their rankings and six experienced increases from 2008 to 2012. UGA has declined in this category since 2009.

Alumni Giving Rank

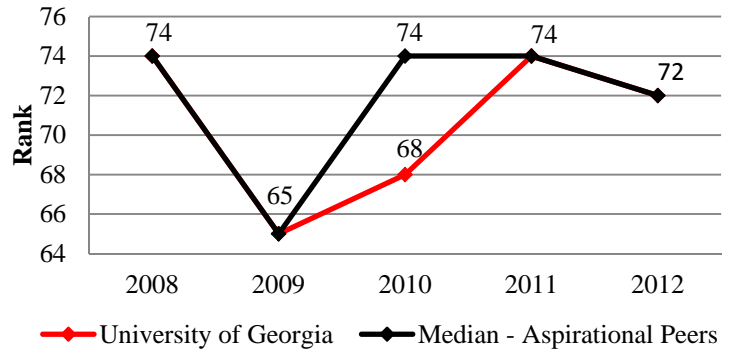

- UGA was ranked 9th in 2011 and moved up to 7th in 2012. Seven peers experienced decreases in rankings from 2011 to 2012, but ten including UGA were ranked higher in 2012 than in 2008.

Appendix B
Board of Regents Peer Comparison**

Executive Summary

All comparative rankings to the Board of Regents Peers (BOR Peers) are out of 13 institutions including UGA.

Institutional Rankings

- UGA ranked 5th in National and Public University rankings against the BOR Peers from 2008 through 2012 (excluding 2011 when UGA was 4th). UGA experienced the largest drop both rankings of the BOR Peers. Since 2008 five BOR Peers have experienced more significant declines than UGA.

Institutional Characteristics

- UGA was ranked near the median of the Undergraduate Academic Reputation Index (6th in 2011; 5th in 2012) among BOR Peers. UGA was ranked 7th in the High School Counselor Score and was one of five schools which did not drop in scores from year to year. On the Peer Assessment Score, UGA gained two spots (5th to 7th) in 2012 as result of Florida dropping from 3.6 to 3.2.

Graduation & Retention Ranking

- UGA was ranked 3rd among the BOR Peers and has made significant gains in this category by increasing 14 spots in the total rankings since 2009. This success is second only to Ohio State University who increased fifteen spots.

Faculty Resources Rank

- UGA has been a leader in this category among the BOR Peers. In 2012, UGA was ranked 2nd and has performed significantly better than the BOR Peers' median ranking. This is a consistent trend for UGA since 2008 but several BOR Peers have made significant progress since 2008.

Selectivity Ranking

- In 2012 UGA was ranked 5th which is consistent with past ranking among the BOR Peers. There is a huge disparity in this category's rankings as University of California - Davis, University of Florida, University of Maryland - College Park, Ohio State University - Columbus, and UGA having separated themselves from the other peers.

Financial Resources Rank

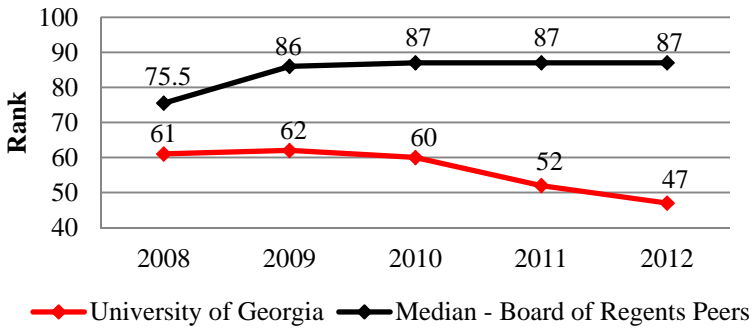

- UGA was ranked 11th and significantly distant from the median ranking of the BOR Peers. UGA's weak positioning in this category is a common trend with the University of Missouri - Columbia being the only BOR Peer ranked lower than UGA for all five years. Only four BOR Peers have seen no or positive change in their rankings from 2008 to 2012.

Alumni Giving Rank

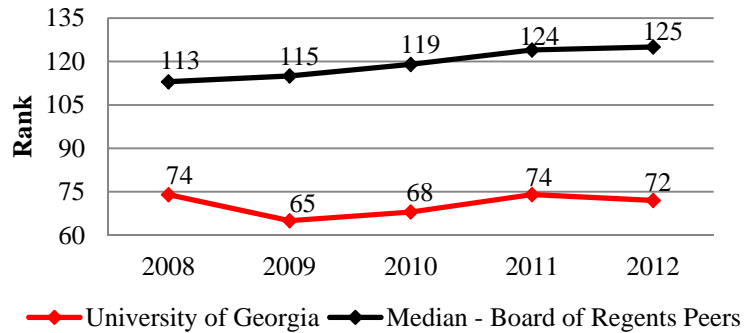

- UGA was ranked 7th in this category in 2012 and 2011. Six BOR Peers also experienced a decrease from year to year. Half of the BOR Peers along with UGA experienced increases since 2008.

**U.S. News and World Report 2011
Appendix C
Observed Peer Comparison**

Overview & Analysis

The author has selected the similar institutions in terms of institutional characteristics that were ranked close (above and below) to UGA in the 2012 ranking to analyze the changes in rankings and statistics from last year's and current U.S. News and World Report editions. The purpose of this analysis is to ascertain reasons for UGA's decline in the Public University rankings. These institutions will be labeled as 'Observed Peers'.

There were several institutions that experienced significant gains in rankings and these changes will be discussed in detail. These gainers were Michigan State University, University of Connecticut, University of Pittsburgh, and Texas A&M University – College Station. Along with UGA, the University of Florida and Purdue University – West Lafayette experienced huge declines. All comparative rankings to the Observed Peers are out of 14 institutions including UGA.

Graduation & Retention Rank

According to the *U.S. News and World Report* methodology, a college's graduation rate performance is an indicator of added value which 'shows the effect of the college's performance and policies on the graduation rate of students after controlling for spending and student characteristics such as test scores and the proportion receiving Pell grants...If the actual graduation rate is higher than the predicted rate, the college is enhancing achievement.' In both reports, UGA enjoys higher predicted and actual graduation rates than most Observed Peers. However, UGA's graduation rate performance and relative standing declined from 2011 to 2012. UGA outperformed their predicted graduation rates in both years, but was ranked 8th in 2012 with a four point difference which was down from 5th with a six point difference in 2011. The graduation rate performance is 7.5% of the total score. Institutions such as Michigan State, Connecticut, and Texas A&M had big gains or held high performance rates from year to year. Conversely, Florida and Purdue have had lower graduation rate performances. This coupled with the strong performances already discussed could be correlated with UGA's decline in the rankings (as well as Florida and Purdue). Michigan State has may profited from a very significant graduation rate performance.

Regarding the freshmen retention rates, UGA was ranked 2nd in both reports with 94% (tied with the University of Maryland). Eight of the 14 observed peers experienced a one percent increase in retention rates (except for University of Connecticut who had 2%). Since the metric constitutes only four percent of the total score, most observed institutions enjoy high and similar scores, and UGA has a high performance relative to these peers, this sub-factor is probably not a substantial cause of UGA's decline in rankings.

Faculty Resources Rank

UGA has enjoyed strong performance in this category. The following points about UGA's performance should be made:

- There is no opportunity to make an informed about the effect of faculty compensation on the Faculty Resource Ranking. This is a result of the inability to obtain the Runzheimer's Cost of Living Adjustment. Although, UGA's non-adjusted faculty salaries were in the bottom half for full, associate, and assistant professors compared to the observed peers. Given, UGA performed well in the Faculty Resources category and with faculty compensation being 7.0% of the total score, it is reasonable to assume that despite lower unadjusted salaries that UGA has competitive faculty salaries.
- UGA ranks in the bottom half of Observed Peers in student/faculty ratio, percentage of full-time faculty, and percentage of faculty with terminal degree, these sub-factors are 1%, 1%, and 3% of the total score.
- UGA has done well in minimizing classes over 50+ and was significantly better than Connecticut, Pittsburgh, and Texas A&M. However, this sub-factor is a smaller percentage of the total score (2%). Given the larger weight placed on the class under 20 students (6% of total score), this should be an area of consider

for UGA. Connecticut and Pittsburgh made gains in this category (1% and 2%); whereas UGA (along with Pittsburgh) declined. UGA was ranked in the bottom half of this sub-factor for both years compared to the Observed Peers.

Selectivity Rank

UGA was one of three Observed Peers which had a decrease in their 25th Percentile SAT Score. Conversely, Texas A&M, Connecticut, and Pittsburgh saw increases. Texas A&M and Pittsburgh increased their SAT 75th Percentile Score, while UGA remained at 1330 in both years. UGA went from being ranked 5th in both percentile scores in 2011 to 9th (25th) and 7th (75th) in 2012. The SAT Scores make up 7.5% of the total score. The fall of UGA's scores in conjunction with increases from Texas A&M, Connecticut, and Pittsburgh could account for some of the change in rankings from year to year. It is important to note that UGA has SAT Scores compared to these schools. However, their increase along with UGA's decrease shows that the distance in our selectivity may be narrowing.

UGA was ranked high in 2011 and 2012 among Observed Peers for the percentage of their incoming freshmen in the top ten percent of graduating high school class and the institution's acceptance rate. However, UGA had two of the worst changes in both sub-factors from year to year. UGA was one of six Observed Peers which had a higher acceptance rate in 2012 than 2011. Since, the acceptance rate is only 1.5% of the total score it not likely that this could cause a substantial drop in UGA's total ranking.

- Despite a slight decline in the percentage of freshmen in the top 10% of their graduating class from 2011 to 2012, this should not be significant reason for UGA's decline because UGA enjoys a higher rate than the three institutions that surpassed it and only Pittsburgh saw an increase (both Texas A&M and Connecticut had the same rates from year to year).
- While, UGA's acceptance rate declined from 2011 to 2012, this should not be a contributor to the changes in ranking because the methodology does not factor in the differences from year to year. Also, UGA has a similar or better percentage than the three institutions which were ranked higher in 2012. Connecticut and Texas A&M experienced decreases in their acceptance rate, Pittsburgh only had a 1% increase, and the fact that acceptance rate constitutes only 1.5% of the total score.

Financial Resources Rank

UGA has been ranked 13th (ahead of Virginia Tech) for the past three reports against Observed Peers. UGA has seen a steady decline in this category among all institutions for the past four years. The three schools that surpassed UGA in the 2012 Public Universities rankings either had insignificant changes in rankings from 2011 to 2012 reports (Pittsburgh with 0; Texas A&M with -1) or big gains (Connecticut with 17 the past two reports). All three institutions were significantly ranked already of UGA at 122 (Texas A&M - 79, Connecticut - 47, and Pittsburgh - 39) in 2012. This category is worth 10% of the total score and UGA's decline might be correlated to the following:

- UGA's performed poorly in educational expenditures per student (e.g. instruction, research, student services, and academic support) with respect to the Observed Peers for 2011 & 2012. UGA ranked at the bottom for instruction, in the bottom half for student services, and in the middle for research and academic support.
- Connecticut ranks 1st in average instruction expenditures for 2009 and 2010, Pittsburgh was 3rd, and Texas A&M was 6th. For research expenditures, Pittsburgh was 1st and Texas A&M was 5th. In regards to total expenditures, Pittsburgh was 1st, Connecticut was 3rd, Texas A&M was 6th, and UGA was 13th. These spending ranks correspond to the positions in the total Financial Resources Rankings.
- UGA had one of the lowest percentage increases in academic related spending in research, instruction, student services, and academic support expenditures per student in both years. Texas A&M and Connecticut

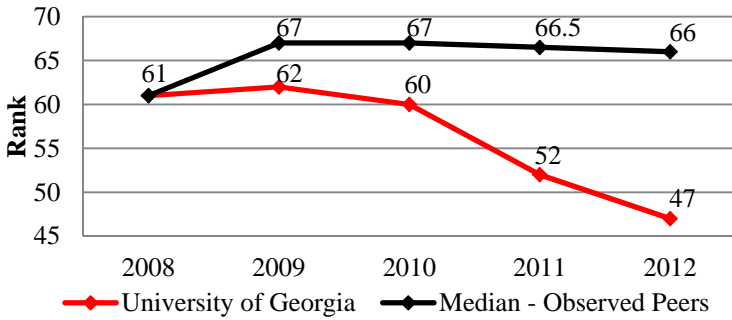

saw substantial increases in most categories. Pittsburgh suffered worse than UGA from year to year, but their funding levels were substantially higher than UGA in both years.

Alumni Giving Rank

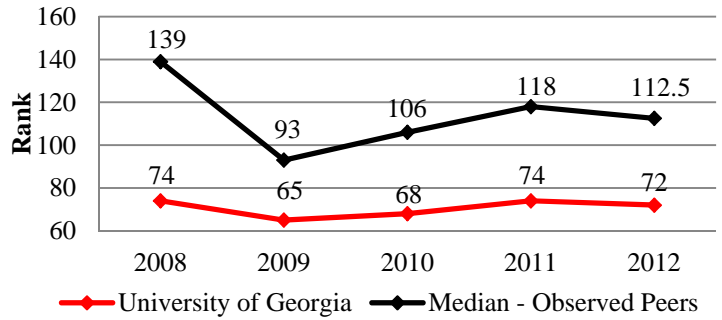

Since the Alumni Giving Rank constitutes 5.0% of the total score it is in all likelihood not a significant contributor to UGA's decline in the Public University Rankings. UGA was ranked 11th in 2011 and 8th in 2012. UGA was one of the few Observed Peers who increased their average alumni giving rate between the years. It is worth noting that Texas A&M University - College Station made strong gains in their ranked among Observed Peers in the alumni giving rate.

* ACT Scores were translated to SAT Scores by using a metric provided by the College Board. For the 25th Percentile the lowest SAT was selected in place of the ACT Score; and for the 75th Percentile the highest SAT was selected in place of the ACT Score. This approximation should sufficiently cover an institution’s score. Asterisk denotes the conversion.
